

INTERDISCIPLINARY  
**CHOICE WORKSHOP**  
 August 7th – 10th, 2018. Santiago, Chile

The ICW is a forum where international researchers from various disciplines/domains encounter to discuss in depth the latest advances and challenges in choice behaviour modelling and decision making. The domains include, but are not restricted to: **behavioural decision-making, environmental economics, health economics, marketing, management science, transportation and urbanism.** The meeting will provide opportunities for open scholarly discussion, while also being accessible to graduate students. The ICW considers four days of sessions with a half day trip. Presentations will be developed in a single session format, with a discussant from a different field. Six prominent keynote speakers will stimulate discussion each day, followed by up to 30 presentations from international scholars. Presenters will be selected following a comprehensive peer review process of extended abstracts. In a second round, accepted presenters will be invited to submit a full paper. Finally, accepted full papers will be included in a special issue of the *Journal of Choice Modelling* (JOCM).

## Important Dates & General Information
